Memory storage

Your menu settings are stored permanently, and in the event of a power failure will *not* be lost. Temporary settings (for example, Contrast, Overseas Mode) *will* be lost. Also, during a power failure the machine will retain the date and time and programmed fax timer jobs (e.g. Delayed Fax) for up to 60 hours. Other fax jobs in the machine memory will not be lost.

Automatic daylight savings time

You can set the machine to change automatically for Daylight Savings Time. It will set itself forward one hour in the Spring, and back one hour in the Autumn.

- 1 Press **Menu**, **0**, **2**, **2**.
- 2 Press **▲** or **▼** to choose **On** or **Off**. Press **OK**.
- 3 Press **Stop/Exit**.

Ecology features

Toner Save

You can save toner using this feature. When you set Toner Save to **On**, prints appear lighter. The default setting is **Off**.

- 1 Press **Menu**, **1**, **4**, **1**.
- 2 Press **▲** or **▼** to choose **On** or **Off**. Press **OK**.
- 3 Press **Stop/Exit**.

Note

We do not recommend Toner Save for printing Photo or Greyscale images.

Sleep Mode

The Sleep Mode Setting can reduce power consumption. When the machine is in Sleep Mode (Power Save mode) it acts as though it were turned off. Receiving data or starting an operation wakes up the machine from Sleep mode to Ready mode.

You can choose how long the machine must be idle before it goes into sleep mode. When the machine receives a fax, computer data or makes a copy, the timer will be reset. The default setting is 3 minutes.

While the machine is in sleep mode the LCD will show **Sleep**.

- 1 Press **Menu**, **1**, **4**, **2**.
- 2 Enter the length of time the machine is idle before entering sleep mode. Press **OK**.
- 3 Press **Stop/Exit**.

Deep Sleep mode

If the machine is in Sleep mode and does not receive any jobs for a certain length of time, the machine will go into Deep Sleep mode automatically and the LCD will show **Deep Sleep**. Deep Sleep mode reduces more power consumption than Sleep mode. The machine will wake up and start warming up, when the machine receives a fax, computer data or makes a copy or when you press a key on the control panel.

LCD Contrast

You can change the contrast to make the LCD look lighter or darker.

- 1 Press **Menu**, **1**, **6**.
- 2 Press **▶** to make the LCD darker. Or, press **◀** to make the LCD lighter. Press **OK**.
- 3 Press **Stop/Exit**.

Mode Timer

The machine has three mode keys on the control panel: **FAX**, **SCAN**, and **COPY**.

You can set how much time the machine takes after the last Copy or Scan operation to return to Fax mode. If you choose **Off**, the machine will stay in the mode you used last.

This setting also sets the time the machine will change from individual user to the Public mode when using Secure Function Lock. (See *Switching Users* on page 7.)

- 1 Press **Menu**, **1**, **1**.
- 2 Press **▲** or **▼** to choose 0 Sec, 30 Secs, 1 Min, 2 Mins, 5 Mins or Off. Press **OK**.
- 3 Press **Stop/Exit**.

Secure Function Lock 2.0

Secure Function Lock lets you restrict Public access to the following machine functions:

- Fax Tx
- Fax Rx
- Copy
- Scan
- USB Direct
- PC Print
- Color Print

This feature also prevents users from changing the Default settings of the machine by limiting access to the Menu settings.

Before using the security features you must first enter an administrator password.

Access to restricted operations can be enabled by creating a restricted user. Restricted users must enter a user password to use the machine.

Make a careful note of your password. If you forget it, you will have to reset the password stored in the machine. For information about how to reset the password call your Brother dealer for service.

Note

- Secure Function Lock can be set manually at the control panel or by using Web Based Management. We recommend using Web Based Management to configure this feature. For more information, see the *Network User's Guide*.
 - Only administrators can set limitations and make changes for each user.
 - When Secure Function Lock is on, you can only use 1.Contrast, 6.Polled TX and 7.Coverpg Setup under 2.Setup Send in the Fax menu.

If Fax Tx is disabled, you cannot use any function in the Fax menu.
 - Polling Receive is enabled only when both Fax Tx and Fax Rx are enabled.
-

Additional sending operations

Sending a fax manually

Manual transmission

Manual transmission lets you hear the dialling, ringing and fax-receiving tones while sending a fax.

- 1 Make sure you are in Fax mode
- 2 Load your document.
- 3 Pick up the handset of an external telephone and listen for a dial tone.
- 4 Dial the fax number you want to call.
- 5 When you hear the fax tone, press **Mono Start** or **Colour Start**.
 - If you are using the scanner glass, press **1** to send a fax.
- 6 Replace the handset of an external telephone.

Dual access (black & white only)

You can dial a number, and start scanning the fax into memory—even when the machine is sending from memory, receiving faxes or printing PC data. The LCD will show the new job number.

The number of pages you can scan into the memory will vary depending on the data that is printed on them.

Note

If you get an *Out of Memory* message while scanning the first page of a fax, press **Stop/Exit** to cancel scanning. If you get an *Out of Memory* message while scanning a subsequent page, you can press **Mono Start** to send the pages scanned so far, or press **Stop/Exit** to cancel the operation.

Broadcasting (black & white only)

Broadcasting lets you send the same fax message to more than one fax number. You can include Groups, One Touch, Speed Dial numbers and up to 50 manually dialled numbers in the same broadcast.

You can broadcast to up to 366 different numbers. This will depend on how many groups, access codes or credit card numbers you have stored, and on how many delayed or stored faxes in memory.

Before you begin the broadcast

One Touch and Speed Dial numbers must be stored in the machine's memory before they can be used in a broadcast. (See *Storing One Touch Dial numbers* and *Storing Speed Dial numbers* in *Chapter 7* of the *Basic User's Guide*.)

Group numbers must also be stored in the machine's memory before they can be used in a broadcast. Group numbers include many stored One Touch Dial and Speed Dial numbers for easier dialling. (See *Setting up Groups for Broadcasting* on page 35.)

How to broadcast a fax

Note

Use ▼ **Search** to help you choose numbers easily.

- 1 Make sure you are in Fax mode .
- 2 Load your document.
- 3 Enter a number.
Press **OK**.
You can use either a One Touch, Speed Dial, a Group number, or a number manually entered using the dial pad. (See *How to dial* in Chapter 7 of the *Basic User's Guide*.)
- 4 Repeat step 3 until you have entered all the fax numbers you want to broadcast to.
- 5 Press **Black Start**.

After the broadcast is finished the machine will print a broadcast report to let you know the results.

Note

The scan profile of the One Touch, Speed Dial or Group number you chose first will be applied to the broadcast.

Cancelling a Broadcast in progress

While broadcasting you can cancel the fax currently being sent or the whole broadcast job.

- 1 Press **Menu, 2, 7**.
The LCD will display the Broadcast job number followed by the fax number or name being dialled (for example, #001 0123456789) and the broadcast job number (for example, Broadcast#001).

27.Remaining Jobs ▲ #001 0123456789 ▼ Broadcast#001 Select ▲▼ or OK
--

- 2 Press ▲ or ▼ to choose one of the following:
 - Choose the fax number being dialled, and press **OK**.
 - Choose the broadcast job number, and press **OK**.
- 3 Press **1** to cancel the fax number or Broadcast job number you chose in step 2, or press **2** to exit without canceling. If you chose to only cancel the fax currently being sent in step 2, the LCD will ask you if you want to cancel the broadcast job. Press **1** to clear the whole broadcast job or **2** to exit.
- 4 Press **Stop/Exit**.

Real Time Transmission

When you are sending a fax, the machine will scan the documents into the memory before sending it. Then, as soon as the telephone line is free, the machine will start dialling and sending.

Sometimes, you may want to send an important document immediately, without waiting for memory transmission. You can set **Real Time TX** to **On** for all documents or **Next Fax:On** for the next fax only.

Note

- If the memory is full and you are sending a black and white fax from the ADF, the machine will send the document in real time (even if **Real Time TX** is set to **Off**). If the memory is full, faxes from the scanner glass cannot be sent until you clear some of the memory.
- In Real Time Transmission, the automatic redial feature does not work when using the scanner glass.

Note

The number of pages you can scan into the memory depends on the amount of data printed on each page.

Delayed batch transmission (black & white only)

Before sending the delayed faxes, your machine will help you economize by sorting all the faxes in the memory by destination and scheduled time.

All delayed faxes that are scheduled to be sent at the same time to the same fax number will be sent as one fax to save transmission time.

- 1 Make sure you are in Fax mode .

This feature will *not* work unless you have already programmed your Station ID. (See the *Quick Setup Guide*.)

You can automatically send a cover page with every fax. Your cover page includes your Station ID, a comment, and the name (or number) stored in the One Touch or Speed Dial memory.

By choosing `Next Fax: On` you can also display the number of pages on the cover page.

You can choose one of the following preset comments.

Routine maintenance

Cleaning and checking the machine

Clean the outside and inside of the machine regularly with a dry, lint-free cloth. When you replace the toner cartridge or the drum unit, make sure that you clean the inside of the machine. If printed pages are stained with toner, clean the inside of the machine with a dry, lint-free cloth.

WARNING

DO NOT use cleaning materials that contain ammonia, alcohol, any type of spray, or any type of flammable substance to clean the outside or inside of the machine. Doing this may cause a fire or electrical shock.

See *To use the product safely* in the *Safety and Legal Booklet* for how to clean the machine.

Be careful not to inhale toner.

IMPORTANT

Use neutral detergents. Cleaning with volatile liquids such as thinner or benzene will damage the surface of the machine.

Checking the Page Counters

You can see the machine's Page Counters for copies, printed pages, reports and lists, faxes or a summary total.

- 1 Press **Menu**, **8**, **2**.
- 2 Press **▲** or **▼** to see **Total**, **Fax/List**, **Copy** or **Print**.
- 3 Press **Stop/Exit**.

Checking the remaining life of parts

You can see the machine's parts life on the LCD.

- 1 Press **Menu**, **8**, **3**.

Packing and shipping the machine

⚠ WARNING

This machine is heavy and weighs approximately 26.5 kg. To prevent possible injuries at least two people should lift the machine. Be careful not to pinch your fingers when you put the machine down.

If you use a Lower Tray, carry it separately from your machine.

! IMPORTANT

When shipping the machine, the waste toner box must be removed from the machine and put in a plastic bag, and then sealed. Failure to remove it and put it in a plastic bag before shipping may cause severe damage to the machine and may void the warranty.

Note

If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid any damage during transit. The machine should be adequately insured with the carrier.

Make sure that you have the following parts for repacking:

- 1 Plastic bag for the waste toner box
- 2 Orange packing materials for locking the internal parts (4 pieces)
- 3 A piece of paper (A4 or Letter) to protect the belt unit (Please supply this yourself)

- 1 Turn off the machine. Unplug the telephone line cord first, disconnect all cables, and then unplug the power cord from the electrical socket.
- 2 Press the front cover release button and then open the front cover.

- 3 Hold the green handle of the drum unit. Pull the drum unit out until it stops.

A

- 4 Turn the green lock lever (1) at the left of the machine anticlockwise to the release position. Holding the green handles of the drum unit, lift the front of the drum unit and remove it from the machine.

! IMPORTANT

- Hold the green handles of the drum unit when you carry it. **DO NOT** hold the sides of the drum unit.
- We recommend that you place the drum unit on a clean, flat surface with a piece of disposable paper underneath it in case you accidentally spill or scatter toner.
- Handle the toner cartridge and the waste toner box carefully. If toner scatters on your hands or clothes, wipe or wash it off with cold water at once.
- To prevent damage to the machine from static electricity, **DO NOT** touch the electrodes shown in the illustration.

- 5 Hold the green handle of the belt unit with both hands and lift the belt unit up, then pull it out.

- 6 Remove two pieces of orange packing material and discard them.

Note

This step is only necessary when you are replacing the waste toner box for the first time, and is not required for the replacement waste toner box. The orange packing pieces are installed at the factory to protect your machine during shipment.

- 7 Remove the waste toner box from the machine using the green handle, and then put it in a plastic bag and seal the bag completely.

! IMPORTANT

Handle the waste toner box carefully. If toner scatters on your hands or clothes, wipe or wash it off with cold water at once.

- 8 Put the belt unit back into the machine. Make sure the belt unit is level and fits firmly into place.

- 9 Install orange packing materials to the drum unit as follows:

- To secure the toner cartridges, install the matching orange packing strips (1) (marked L and R) to the drum unit on the left and right sides, as shown in the illustration.
- Attach the orange packing strip (2) to the left side of the drum unit, as shown in the illustration.
- Slide the small orange packing material (3) onto the metal shaft on the right side of the drum unit, as shown in the illustration.

- 10 Put a piece of paper (A4 or Letter) on the belt unit to prevent damage to the belt unit.

- 11 Make sure the green lock lever (1) is in the release position as shown in the illustration.

- 12 Match the guide ends (2) of the drum unit to the ► marks (1) on both sides of the machine, then gently slide the drum unit into the machine until it stops at the green lock lever.

- 13 Turn the green lock lever (1) clockwise to the lock position.

- 14 Push the drum unit in until it stops.

- 15 Close the front cover of the machine.

- 16 Put the Styrofoam piece (1) into the carton. Then put the waste toner box in the Styrofoam piece.

- 17 Wrap the machine with a plastic bag. Put the machine on the Styrofoam piece (1).

- 18 Put the two styrofoam pieces (1) into the carton matching the right of the machine to the "RIGHT" mark on one of the styrofoam pieces, and the left of the machine to the "LEFT" mark on the other styrofoam piece. Put the AC power cord and printed materials in the original carton as shown in the illustration.

- 19 Close the carton and tape it shut.

Optional paper tray (LT-300CL)

An optional lower tray can be installed, and it can hold up to 500 sheets of 80 g/m² paper.

When an optional tray is installed, the machine can hold up to 800 sheets of plain paper.

For setup, see the Instructions that we have supplied with the lower tray unit.

**Note**

- There might be some SO-DIMMs that will not work with the machine.
- For more information, call the dealer you bought the machine from or Brother Customer Service.

Installing extra memory

- 1 Turn off the machine's power switch. Unplug the telephone line cord.
- 2 Disconnect the interface cable from the machine, and then unplug the power cord from the electrical socket.

**Note**

Be sure to turn off the machine's power switch before you install or remove the SO-DIMM.

- 3 Remove the plastic (1) and then metal (2) SO-DIMM covers.

- 4 Unpack the SO-DIMM and hold it by its edges.

**IMPORTANT**

To prevent damage to the machine from static electricity, DO NOT touch the memory chips or the board surface.

- 5 Hold the SO-DIMM by the edges and align the notches in the SO-DIMM with the protrusions in the slot. Insert the SO-DIMM diagonally (1), then tilt it toward the interface board until it clicks into place (2).

- 6 Put the metal (2) and then the plastic (1) SO-DIMM covers back on.

- 7 Plug the machine's power cord back into the electrical socket first, and then connect the interface cable.

- 8 Plug in the telephone line cord. Turn on the machine's power switch.

Note

To make sure that you have installed the SO-DIMM properly, you can print the user settings page that shows the current memory size. (See *How to print a report* on page 39.)
